SUMMARY

Innovative and self-motivated Full Stack Web Developer with hands-on experience in building robust web applications using Django and MongoDB.Passionate about solving real-world problems through code and constantly exploring new ways to improve performance and design.Eager to contribute to collaborative teams, create impactful solutions, and grow in fast-paced development environments.

EDUCATION

Manakala Vinayagar Institute of Technology
B.TECH – Computer Science(2023-Present) 8.68 CGPA (up to 3rd semester)

Petit Seminaire Higher Secondary School
Higher Secondary (2021-2023)   84%

PROJECTS

- **Loan Eligibility Prediction**
  - Developed a loan eligibility prediction system using Python to classify applicants based on financial and personal inputs.
  - Used Pandas for data handling, scikit-learn for machine learning, and Tkinter for GUI development.
  - Helps users quickly assess their loan eligibility through an interactive desktop interface.

- **Currency Converter**
  - Developed a desktop-based currency converter using Python to convert values between multiple international currencies.
  - Implemented a user-friendly interface using Tkinter, with real-time conversion rates fetched through a currency API or static logic.
  - Helps users perform quick and accurate currency conversions without needing an internet browser.

TECHNICAL SKILLS

- **FRONTEND**   : HTML5, CSS3,Sass, JavaScript
- **BACKEND**   : Python, Django
- **DATABASE**   :   MongoDB
- **IDE**   : VS Code
- **VERSION CONTROL** : Git,GitHub

ACHIEVEMENTS

- Certified in Full Stack Web Development (Python/Django) – Ocean Academy
- Achieved 2nd Place in Paper Presentation – InstruX 2024, Puducherry Technological University
- Solved 700+ coding problems on Skillrack
- View all Certificates
